Frame & Sash

1 Select wood components are kiln dried, and treated with water/insect repellent and preservative. Interior wood surfaces are available in complimentary pine or fir, or optional wood species of cherry, hickory, African mahogany, maple, oak, walnut or alder. Interior surfaces are available unfinished or factory primed. Optional factory finishes in a variety of stains and basecoats are available.

2 Wood components are fitted with aluminum extrusions on the exterior. 50 colors conforming to AAMA 2604-98 are available, as well as custom colors. Also available is a selection of seven exterior anodized options.

Glazing

3 High-Performance™ Low-E4® glass with a low-conductance spacer. Tinted, clear IG, high-altitude glass and other special glazing options are available.

4 Glass is fixed in place from the interior with wood stops, that can be removed for easy reglazing if necessary.

Weather Strip

Compression foam-filled bulb weather strip is applied on the sill for maximum resistance to water and air infiltration. Outside and inside sashes are sealed with a compression bulb weather strip at the interlock.

Head & Sill Track

5 The frame consists of a rigid vinyl head and sill track. The head track is backed with flexible hinges to help create a positive seal between the sash and frame.

Hardware

6 Slimline finger-pulls allow easy operation and do not interfere with window coverings.

Flush mount sash locks and keepers provide a slim, clean design and a tight fit at the interlock.

Hardware is available in finishes of bronze, white, black and gold. Optional polished brass plated finishes also available.
